

- CSCE 242 Topic Selection
- The name of my website will be “Mama’s Meatballs”.
- The topic of this website will focus around recipes. The name Mama’s Meatballs refers to Italian cooking so it will focus purely on classic Italian recipes. The website will be more than enough for 5 pages and will have the ability to submit homemade recipes as well as learn some new ones. It could even add some interactive elements like featuring new recipes on the homepage. I specifically chose Italian because I love spaghetti and it’s the only dish I really know how to cook. I take my spaghetti very seriously.
- The 5 pages will be: About, Submit a Recipe, Recipe of the Day, Home, and Browse Recipes
- The data that will be stored is a collection of recipes: Recipe name, Description, Ingredients, Basic instructions, Prep time, Category, and Image URLs. User submitted recipes can also be stored and reviewed by the top chef (me).
